FLIGHT AIR S200

To properly appreciate some things you need to experience them as they are intended. Once experienced, the Fakir Flight Canister Series cleaners will leave you with an appreciation of the attention to details and what it means to own a vacuum delivering superior cleaning performance. The Flight's design demonstrates Fakir's continuing commitment to a deliver a product reflecting careful engineering with a customer focus. The big things like extraordinary power are delivered effortlessly while the attention to the smallest details like the quiet running over molded wheels leave you confident in your decision to step up to a Fakir Flight.

 FLIGHTSERIES

FLIGHT TURBO S200T

Moving your flight canister across the floor the first thing you will notice is there isn't any noise coming from the soft over molded wheels passing across your hardwood floor.

A soft pull on the cord releases and holds the cord to the length desired to reach across the space to be cleaned or extend it the full 25 feet to permit movement from room to room.

As soon as the power goes on you will notice the performance difference designed into the Fakir motor. The speed control feature allows you to adjust the Flight's power to the level necessary for effective cleaning, from your finest oriental rug to sheer draperies the speed control gives you just enough power to meet your needs.

Even with the Flight's speed control adjusted to its full 1400 watts you will hardly notice the quiet 67 db Flight canister. You are more likely to hear the powerful air stream than the vacuum.

The 360 degree hose connection coupled with the over molded wheels and front quiet running swivel caster lets the Flight canister move over both hard floors and carpet with minimum effort.

Equipped with a full compliment of on board accessories you always have the tool you need at hand. The Turbine model provides an ideal solution for area rugs and stairs utilizing the complimentary hand turbine. Both turbines take advantage of the extraordinary power of the Fakir Flight.

The generous seven foot hose and telescopic wand extends the cleaning radius of the Fakir Flight to a full 34 feet.

A five ply micro fiber bag with built in closure system is supported by four additional levels of filtration including an activated carbon backed hepa filter means clean air. You pick the dirt up and capture it not redistribute it around the room like some cleaners.

FEATURE AND BENEFITS

The real story is the attention to quality in all aspects of the Fakir Flight canister series. Every system shows consideration to design and attention to durability. This is not the typical canister designed to be assembled once and thrown away if something goes wrong. The Flight canisters are designed for years of reli-

able performance with minimum attention. Our strong sense of responsibility to environmental concerns is reflected in a Flight canister that can be expected to deliver on its promise of effective cleaning well beyond five years if properly maintained.

All Fakir Flight canisters deliver 1400 watts of cleaning power and a speed control system that lets you match the power to your cleaning needs. An electronic sensor indicates filter status so you know the system is delivering on its clean air promise.

A full complement of on board cleaning accessories are at your finger tips.

A soft molded front swivel caster permits easy maneuvering of your Flight canister and insures you get the benefit of your seven foot hose.

Soft over molded wheels silently glide your Flight over hard floors without the risk of marking.

Your Flight canister features a premium no twist cord and reliable retraction system for cord recovery when you are finished cleaning.

The 360 degree swivel connector permits the Flight to move easily around the room while preventing hose kinks or unnecessary movement of the canister.

Standard on the 54540 the Fakir hand turbine is ideal for use on stairs or upholstery surfaces.

With a unique floating agitator the 54551 Fakir floor turbine is ideal on area rugs and fine Orientals.

A premium combination tool provides excellent cleaning results as it moves quietly over hard floors and easily over carpets.

The optional 34177 floor turbine offers an alternative for homes with more carpet or carpets laid over generous padding.

Five ply micro fiber bags are standard on all Flight series air canisters. If additional filtration is desired consider the Hepa level Fakir allergy bag. Both bag styles are supported by Hepa panel filter including an activated carbon panel to capture even the smallest particulate. Flight canisters deliver clean air.

passion for homes

All Flight series canisters have a convenient park feature to minimize storage space when it is stored between uses. second park feature is built into the back of the canister permitting you to park your tools should you need to leave the canister in the center of the room.

A special woven after motor filter even captures the fine carbon dust associated with motor brush wear.

THE FAKIR COMPANY

Fakir was established in 1933 in the town of Muehlacker, Germany and immediately established itself a manufacturer of technologically innovative high quality domestic cleaning appliances. Due to the consistent growth of the company Fakir relocated to their present facilities in Vaihingen Enz, near Stuttgart Germany. Today the Fakir brand is recognized throughout Europe for floor care products delivering superior performance, reliability and durability. A sharp focus on Fakir's core competence in cleaning systems coupled with uncompromising quality standards is reflected in the entire range of Fakir products. The Fakir tradition for delivered performance is viewed more than a commitment to our customers, it is an obligation.
