

FLIGHTSERIES

After a few turns around your home or office you will appreciate the attention to detail in Fakir's "Flight Series" uprights. The careful engineering and customer conscious design can be found in the big things like the superior cleaning power of these two motor uprights and on board tool system that is there when you want it but out of the way when you don't, but also in the small details you will come to appreciate like a cord lock that really works when you are finished cleaning.

ATTENTION TO DETAIL

The design of the "Flight Series" uprights delivers a complete cleaning solution designed for ease of use without compromising on your goal of fast effective cleaning.

Release the generous 40 foot power cord with a simple twist of the upper caddy lever and you will notice the swiveling strain relief that protects the cord from kinking and unwanted wear.

As you tap the release lever to begin vacuuming you will notice the large over molded wheels which work with the Flight's unique roller system to provide effortless cleaning even on high pile carpets.

Adjust the height of the floor nozzle to carpet conditions to insure a deep clean and surface grooming.

As soon as the power goes on you will recognize the cleaning advantages of the Flight's two motor system. You are not robbing power from the vacuum to drive the agitator.

What you won't notice is the noise. Operating at 67db the Flight series cleaners are quiet without compromising performance.

The feel you'll get from the handle of the Flight Series cleaner communicates the solid design you expect in a premium upright. Angled for comfort and control the Flight's handle allows you to take advantage of the superior maneuverability associated with Flight's unique wheel system.

As you put the Flight into a parked position to attend to above the floor cleaning, you'll notice the agitator shuts off protecting your floor surfaces from the agitator's rotation. You'll get the same result if you choose to release the on board hose and wand for a quick touch up as you continue vacuuming.

When cleaning above the floor you will notice the benefits of having a two motor system. All Flight models are equipped with two motors, one exclusively for rotating the brush roll and the other designed specifically for suction power. When releasing the hose and wand assembly from the rear of the vacuum you have 100% utilization of the main suction motor thus maximizing full suction power at the end of the hose. With the on board crevice and upholstery tools you are now able to clean above the floor as effectively as you have the carpeted surfaces in your home or office.

The real story is the attention to quality in all aspects of the Flight Series cleaners. Every system shows consideration to design and attention to durability. This is not the typical disposable upright. It is designed for years of reliable service without declining performance. Our strong sense of responsibility to environmental concerns is reflected in the expectations of each Flight series upright vacuum, and can be expected to deliver on its promise of effective cleaning well beyond your expectations.

THE FLIGHT SERIES

Ask your Fakir dealer about the standard Flight Series warranty and other extended life service options.

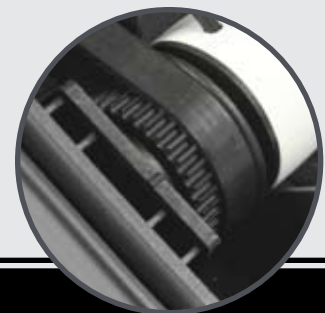

Easy access to the agitator on the 12" and 14" models can be achieved without the use of tools. Even the 18" model requires only one screw be removed to grant access.

The Flight Series agitators are designed for long life. The unique ball bearing end caps may be rotated 180° resulting in the extended life your agitator and like new cleanability.

Everything about the Flight Series uprights is designed to insure long life and easy repair should repair even be necessary. Unlike many products made today the Flight Series is designed with materials and easy access that allows the system to be easily serviced. We won't say it will last forever, but properly maintained it will seem like it.

The S314 and S318 use reinforced geared belts for extended life to support the wider cleaning tracks.

FEATURE AND BENEFITS

Select the Flight series model S312 (12"), model S314 (14"), model S318 (18") based on the needs of your space. The 12" is ideal for small or limited carpet areas, the 14" is a great compromise for efficiency and access, the 18" is great for large open spaces like office lobbies and hallways.

The winged design of the model S314 (14"), model S318 (18") makes cleaning around furnishings easier by providing more access outside the body of the cleaner. The low profile platform permits you to clean under furnishings like beds and desks.

The large over molded wheels and unique roller system results in more maneuverability and less effort during cleaning.

The Flight Series uprights feature electronic monitoring of the agitator and filter

systems. Operational performance is clearly indicated with high illumination lights when attention to the system is necessary. There is a built in relief valve should the system be clogged to protect the vacuum motor from excessive heat.

All Flight Series uprights come equipped with a multi layer paper Bag and HEPA cartridge filter to assure clean air exhaust keeping your home or office healthy and dust free.

THE FAKIR COMPANY

Fakir was established in 1933 in the town of Muehlacker, Germany and immediately established itself a manufacturer of technologically innovative high quality domestic cleaning appliances. Due to the consistent growth of the company Fakir relocated to their present facilities in Vaihingen Enz, near Stuttgart Germany. Today the Fakir brand is recognized throughout Europe for floor care products delivering superior performance, reliability and durability. A sharp focus on Fakir's core competence in cleaning systems coupled with uncompromising quality standards is reflected in the entire range of Fakir products. The Fakir tradition for delivered performance viewed more than a commitment to our customers, it is an obligation.
